Linux's new Gnome desktop to take on KDE and Windows

KDE 4.0 is winning over users with the advances it has made for the Linux desktop. Unless Gnome undergoes a similar metamorphosis, it's living on borrowed time - it's clearly now been overtaken by both Windows 7 and KDE 4.0 in meeting the demands of a modern interface, both in flair and functionality.

What happens with Gnome has special importance for Ubuntu, too - as the 'premier' desktop Linux that most new users to Linux experience, it's important that it can meet their expectations in terms of a visually appealing and easy to use interface. And while KDE 4.0 is arguably prettier than Windows 7, it's not the default for Ubuntu.

Fortunately, Gnome is undergoing a change. The first major move in eight years of development, in fact. As I covered KDE extensively last issue, it's only fair we take a look at what the next major milestone of Gnome will bring and whether it can compete to provide a next-generation experience. Afterall, assuming Canonical sticks with Gnome, this is what the future of Ubuntu will look like.

GCHQ spooks top UK Linux installations

The largest installation of Linux desktops in any British Government site is at GCHQ, the high-tech spy-station in Cheltenham, according to industry sources.

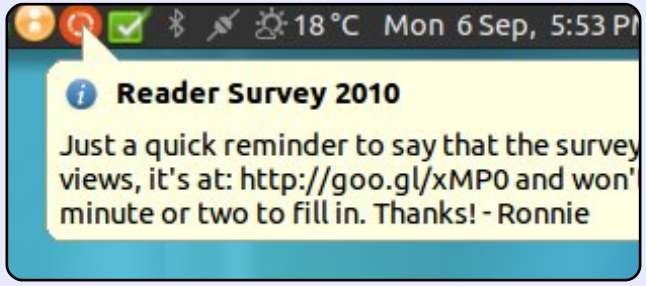

Whispers in the courtly corridors around Westminster, the seat of British government, have it that British intelligence uses Linux because it is secure, good at number crunching, and doesn't cost much to deploy.

LoCo INTERVIEW

Supplied by Amber Graner

Greg Grossmeier

Ubuntu Michigan LoCo Team

A LoCo Team is a Local Community of Ubuntu users. A LoCo can involve things such as local promotion, support in the local language, general support to local users and much more. Most importantly however, it lets people find other Ubuntu users near them and experience the Ubuntu Community firsthand.

In the latest LoCo Team interview in this US Teams Interview Series – LoCos, Leaders, and Lessons Learned - Amber Graner talks to Greg Grossmeier of the Ubuntu Michigan LoCo Team. Greg talks about the history of the team, resources, events, a new podcast put together by Ubuntu Michigan team members and more!

US-Teams: Could you tell us a little about you and what your role in the LoCo Team is?

If you have Ubuntu-related questions, email them to: questions@fullcirclemagazine.org, and Gord will answer them in a future issue. Please include as much information as you can about your problem.

Q Is there a way to record streaming audio?

A , . F , G .

Q The wireless doesn't work in my HP G62 laptop.

A C E , A /H D . B A , "A ."

Q I purchased a USB sound card. When I plugged it in, it did not work. What do I have to do?

A G > > / B .

Q I have a Dell Inspiron 9400 with an ATI Radeon Mobility X1400 graphics card. I have an external monitor connected using a VGA cable. When I try to use the external monitor as an extension of my main screen, the image goes all wavy and jumps around.

A I . . , . A I C C C .

Q Do you think Samba will be a little bit better for new users in 10.10?

A (*Dmizer*) I ' . . , , / .

Q Once installed, sopcast launches successfully but only about 10% of the channel list actually work. Among the Chinese channels (the ones I'm most interested in) only CCTV3 is working; for every other Chinese channel I always get a "connecting" message.

A I , I . I ://. . /. ://. . /!

Q After an update, my "Nvidia Xserver" does not recognize my monitor all of a sudden, displaying "unknown" instead of the monitor name, and giving me 1024x768 resolution instead of the 1600x1200 that it used to. If I switch to the "guest" user, the Nvidia Xserver recognizes the monitor like it used to, and displays the proper resolution. What is going on?

A :

```
sudo nvidia-xconfig

gksudo nvidia-settings
```

I have a 2GB /boot partition shared with Sabayon and Fedora, a 77GB Sabayon partition, a 200GB Fedora partition, and a 200GB Ubuntu partition. Ubuntu detects Fedora perfectly, however, there is no Sabayon. Today Ubuntu upgraded my

kernel and my triple-boot is, once again, broken. Is there some way I can fix my triple-boot so that, when Ubuntu upgrades the Grub menu, it includes Sabayon?

local community support team

The Ubuntu UK podcast is presented by members of the United Kingdom's Ubuntu Linux community.

We aim is to provide current, topical information about, and for, Ubuntu Linux users the world over. We cover all aspects of Ubuntu Linux and Free Software, and appeal to everyone from the newest user to the oldest coder, from the command line to the latest GUI.

Because the show is produced by the Ubuntu UK community, the podcast is covered by the Ubuntu Code of Conduct and is therefore suitable for all ages.
